ABOUT ME

Aspiring Data Analyst with a strong foundation in Python, MySQL, Excel, and Power BI. Passionate about data-driven decision-making and problem-solving. Seeking an entry-level position to apply analytical skills and technical expertise in a dynamic organization.

EDUCATION

Diploma in Computer Science & Engineering

2021-2023

Pacific University, Udaipur

- Awarded with silver medal in academic excellence

Bachelor of Technology in Computer Science & Engineering

2023-2026

Techno NJR Institute of Technology, Udaipur

TRAINING & PROJECTS

Data Analytics Training–Techno Globe

- Gained proficiency in Python programming for data manipulation, analysis, and visualization.
- Acquired hands-on experience in MySQL for data extraction, transformation, and database management.
- Enhanced skills in Excel, including advanced formulas, pivot tables, and data visualization
- Learns different types of designing charts, maps and other methods in Power BI Tool.

Super Store Sales Dashboard | Power Bi Project

- This Power BI project analyzes sales data from a retail superstore. It visualizes key metrics like sales, profit, quantity, and customer segments across different regions, products, and time periods.
- The dashboard helps identify top-performing items, customer trends, and business insights to support decision-making.

Tools Used – Power Bi, Excel, DAX

Swiggy Dashboard | Power Bi Project

- This dashboard helps Swiggy understand its business performance, customer behavior, regional trends, and restaurant insights.
- It uses interactive visuals like KPIs, bar charts, pie charts, maps, and tables to deliver clear and actionable insights.

Tools Used – Power Bi, Excel, DAX
